

Metal Mesh

Our architectural metal mesh is defined by its balance of strength, flexibility, and visual control. Designed to shape light, airflow, and perspective, each mesh is precisely woven to deliver consistent performance and dimensional stability. Durable and corrosion-resistant, the material adapts seamlessly to interior and exterior applications, adding texture, transparency, and movement while maintaining long-term reliability.

Applications:

- Feature walls
- Decorative Wall panels
- Space dividers
- Cabinet and millwork
- Closet and wardrobe doors

Certifications:

- Corrosion-resistant PVD color coating, 96-hour salt spray tested
- Abrasion and wear resistant; maintains integrity under repeated cleaning
- Optional anti-fingerprint surface verified for practical use
- Coating remains intact with no substrate exposure
- Independently laboratory-tested for quality assurance
